EXECUTIVE SUMMARY

Mission Statement

Watch Your Health (WYH) is India's foremost InsurTech / HealthTech platform that blends AI, gamification, and analytics to drive health engagement, reduce claims, and improve health outcomes across Insurance, Hospitals, Pharma, and Diagnostic Labs.

30M+ Total Users Active Platform	17.5M+ App Downloads iOS & Android	4.8 ★ App Rating Play Store	₹26.3 Cr FY24 Revenue 93% YoY CAGR
\$7.39M Total Funding 3 rounds	~167 Employees Dec 2024	3,300+ Lab Network Nationwide	India+GCC+SEA Markets Active

PHASE 1 — COMPANY RESEARCH

1.1 Company Overview

Attribute	Detail
Founded	2015 (Incorporated 22 Jul 2015)
Legal Name	Watch Your Health.com India Private Limited
CIN	U85100MH2015PTC266803
Headquarters	401, 4th Floor, Lodha Supremus 1, Road No. 22, Wagle Estate, Thane, Maharashtra 400604
Certifications	CDSCO Approved • FDA Registered • ISO 27001 • ISO 13485 • HIPAA Compliant
Revenue (FY24)	₹26.3 Cr (~\$3.1M USD) 93% YoY CAGR
Funding	\$7.39M total across 3 rounds
Team Size	~167 employees (Dec 2024)
Active Markets	India, GCC (Gulf), Southeast Asia
App Rating	4.8★ 17.5M+ Downloads 30M+ Users
Industry	InsurTech / HealthTech / Digital Wellness

1.2 Leadership & Founders

Name	Role	Background
Ratheesh Nair	MD & CEO (Founder)	15+ years in product design & online consumer behavior. Architect of WYH's AI + gamification vision.
Jay Patel	CFO	Chartered Accountant with expertise in product pricing, financial analysis, and operational excellence.
Prachi Shinde	CIO	Technologist with 15+ years delivering complex, secure, and scalable enterprise solutions.
Prashanth Prabhakaran	CSO	30 years capital markets leadership; ex-CEO at YES Securities, Kotak Securities, and IIFL.
Hesham Helmy	Advisor (Egypt)	20+ years across insurance, brokerage, and financial services in MENA region.
Khalid Al Gwaiz	Advisor (KSA)	Strategic vision for digital health innovation across Middle East and North Africa.
Siddarth Raisurana	Advisor (India)	Private equity, banking, NBFC, insurance, investment banking background.
Paul Hennessy	Advisor (UK)	Sony, Dell, fintech, global broadcast experience; leads WYH's European market entry.

1.3 Funding History

Round	Amount	Investor(s)	Date	Purpose
Series A (Round 1)	\$2.2M	Conquest Global Ventures (Singapore)	Jun 2023	Product dev, geo expansion, marketing
Series A (Round 2)	\$5M	Cornerstone Ventures (India) + Conquest Global	Jul 2024	Scale operations, expand user base, tech infra
Total Raised	\$7.39M	7 investors	2015–2024	Growth & global expansion

1.4 Business Model Analysis

Revenue Streams

Revenue Stream	Model	Customer	Value Proposition
SaaS Platform License	B2B Annual/Monthly Fee	Insurance Companies	White-labeled engagement platform to retain policyholders
Per-User Engagement Fee	B2B Per Employee	Corporates / Hospitals	Health program deployment per covered life
Disease Management Programs	B2B Per Patient	Pharma / Hospitals / Labs	Patient adherence, reversal programs
Diagnostic Lab Tie-ups	Revenue Share	3,300+ Labs	Health check bookings via WYH apps
Telemedicine / Doctor Consult	Per Consultation	B2C end users	Virtual doctor access revenue
Data & Analytics Reports	License / Reports	Corporates / Insurers	HR health dashboards and risk reports

1.5 B2B Value Proposition by Segment

Segment	Problem Solved	WYH Solution	Proven Outcome
Insurance Companies	Low policy persistency & high claims	Gamified engagement + health rewards	Persistency +20%, Claims -10%, Engagement +21%
Hospitals	Low patient adherence & follow-up	Real-time monitoring + post-discharge care	Adherence +30%, Patient improvement +7%
Pharma	Poor treatment compliance	Patient Support Programs + digital nudges	Adherence 43%→72%, Longevity +33%
Diagnostic Labs	Low health check-up utilization	In-app booking via white-label apps	3,300+ lab network; Annual Health Check campaigns
Corporates	Employee health cost & productivity loss	Corporate Dashboard + Wellness Programs	Disease risk projection, health indices, cost savings

PHASE 2 — INDUSTRY & COMPETITOR ANALYSIS

2.1 Indian HealthTech Market Snapshot (2024–2025)

\$14.5B Digital Health Market 2024 India	\$107B Projected by 2033 CAGR 25.1%	9,087+ Active HealthTech Cos. India Jan 2026	\$10.2B Total Sector Funding All time India
--	--	---	--

Key tailwinds: Ayushman Bharat Digital Mission (670M+ ABHA accounts), rising chronic disease burden, 25% CAGR in digital health, 90%+ health insurance policies now issued digitally, and IRDAI's push for InsurTech innovation.

2.2 SWOT Analysis — Watch Your Health

 STRENGTHS • Unique 'engagement platform' model with >60% active usage vs <15% industry average • CDSCO + FDA + ISO 27001 + HIPAA certifications — regulatory moat • 30+ AI-powered assessments — most comprehensive in the Indian market • Deep lab network: 3,300+ diagnostic partners nationwide • Proven ROI metrics: persistency +20%, claims -10%, adherence +30% • Profitable in FY21 & FY22; 93% revenue CAGR • White-label B2B model allows rapid scale without direct customer acquisition cost • Global advisory board with MENA, UK, and India expertise	 WEAKNESSES • Revenue still relatively small (~₹26.3 Cr) vs larger competitors • Limited brand recognition at consumer (B2C) level • Dependence on B2B enterprise contracts — concentration risk • Small team (~167) limits simultaneous execution on multiple fronts • AI assessment accuracy could face clinical validation scrutiny • Limited public case studies vs competitors like Practo or MediBuddy
 OPPORTUNITIES • \$107B India digital health market by 2033 — massive runway • GCC and SEA markets underpenetrated in health engagement • European expansion via Paul Hennessy advisory relationship • ABHA integration and government digital health push • Mental wellness demand post-COVID still growing rapidly • Rising corporate wellness spend by HR departments • AI in diagnostics (X-ray reading, Face Vital Scan) becoming mainstream • Pharma patient support programs worth billions annually	 THREATS • Aggressive, better-funded competitors: Practo, Tata 1mg, MediBuddy • Plum, Loop Health, Ekincare directly competing in corporate wellness • HealthifyMe and Cult.fit targeting consumer wellness segment • Data privacy regulation risk (Digital Personal Data Protection Act) • Talent war in HealthTech creating attrition risk • Insurance company partnerships can be renegotiated or withdrawn • Global tech giants (Google Health, Apple Health) entering India

2.3 Competitive Feature Comparison

Feature / Company	WYH	Plum	Loop Health	Ekincare	MediBuddy	HealthifyMe
Insurance Integration	☒ Core	☒ Core	☒ Core	☒ Yes	☐ Limited	☐ No
AI Health Assessments (30+)	☒ Unique	☐ No	☐ No	☐ Basic	☐ Basic	☐ Basic
Gamified Engagement	☒ Core	☐ No	☐ No	☐ No	☐ No	☐ Limited
White-Label B2B	☒ Yes	☐ No	☐ No	☒ Yes	☐ No	☐ No
Lab Network (3,300+)	☒ Yes	☐ No	☐ No	☒ Yes	☒ Yes	☐ No

Funding Raised	\$7.4M	\$41.2M	\$41M	~\$20M	~\$95M	~\$75M

2.4 Market Gap Analysis — WYH Opportunities

Market Gap	Current State	WYH Opportunity	Estimated Market
Insurance + Wellness Integration	Most wellness apps don't connect to insurance	WYH's core — expand to more insurers	₹500 Cr+
Pharma Patient Adherence	Largely manual / call-center based	AI-driven digital patient support programs	₹300 Cr+
Senior Citizens Health Monitoring	Fragmented, no integrated solution	Fall risk + sarcopenia + cardiac for >60s	₹200 Cr+
Post-Discharge Remote Care	High readmission rates, poor follow-up	WYH's post-discharge module — scale up	₹150 Cr+
MENA / SEA Insurance Wellness	Very low penetration	WYH already live in GCC — expand	\$500M+
Genetic Risk Programs	Consumer genomics nascent in India	WYH's Genetic Risk Tracking feature	₹100 Cr+

PHASE 3 — BUSINESS ANALYST ASSESSMENT

The following findings are structured as a BA presenting to WYH's CEO and Product Head.

3.1 Key Business Challenges & Recommendations

#	Challenge	Root Cause	Recommendation	ROI / Impact	Priority
1	Low conversion of registered to active users	Onboarding friction; too many assessment options upfront	Implement AI-guided onboarding with 3-step Health Passport	MAU +25%, Retention +15%	● Critical
2	Insurance partner churn risk	Single-contact dependency in insurer org	Build stakeholder mapping & multi-contact engagement	Revenue protection ₹5-8 Cr	● Critical
3	Weak product analytics visibility	No centralized event tracking across modules	Implement Mixpanel / Amplitude with funnel dashboards	Data-driven decisions 3x faster	● Critical
4	AI assessment adoption plateau	Users complete 1-2 assessments, don't return	Gamified 'Health Score' that evolves with more assessments	Assessment completions +40%	● High
5	Manual reporting to B2B clients	No self-serve dashboard for insurer / HR clients	Build real-time B2B client portal with white-label reports	Account expansion +30%	● High
6	Limited NPS & feedback loops	No systematic user feedback mechanism post-assessment	In-app NPS + micro-surveys after key actions	Product quality improvement	● High
7	Pharma segment under-monetized	Pharma programs run as pilots without SLA framework	Define SLA, outcome metrics, and pricing tiers for pharma	Revenue +₹3-5 Cr	● Medium
8	Data siloes across modules	Assessment, tracking, and expert services don't share data	Build unified Health Intelligence Layer (HIL)	Personalization +50%	● Medium
9	No predictive claims analytics	Claims data only analyzed retrospectively	ML model to predict high-risk members 6 months ahead	Claims savings 15-20%	● Medium
10	International product localization gap	India UI/UX pushed to GCC/SEA without adaptation	Dedicated localization sprint for Arabic/Malay versions	GCC revenue +40%	● Medium

PHASE 4 — POWER BI DASHBOARD DESIGNS

Four executive dashboards are designed below as wireframe specifications ready for implementation in Power BI, Tableau, or WYH's internal analytics stack.

Dashboard 1: Executive Overview Dashboard

Purpose

Give the CEO and Leadership a single-screen health of the business — from user growth to revenue to client retention.

KPI Cards — Row 1

30.2M Total Registered Users ↑ 18% MoM	18.1M Monthly Active Users 60.3% MAU Rate	847 Corporate Clients ↑ 23 this month	₹26.3 Cr FY24 Revenue 93% YoY CAGR
---	--	--	---

KPI Cards — Row 2

2.4M Claims Processed ↓ 10% claim ratio	83% Policy Persistency ↑ from 63%	91.2% Customer Retention 12-month cohort	62% Wellness Engagement Rate Vs 15% industry avg
--	--	---	---

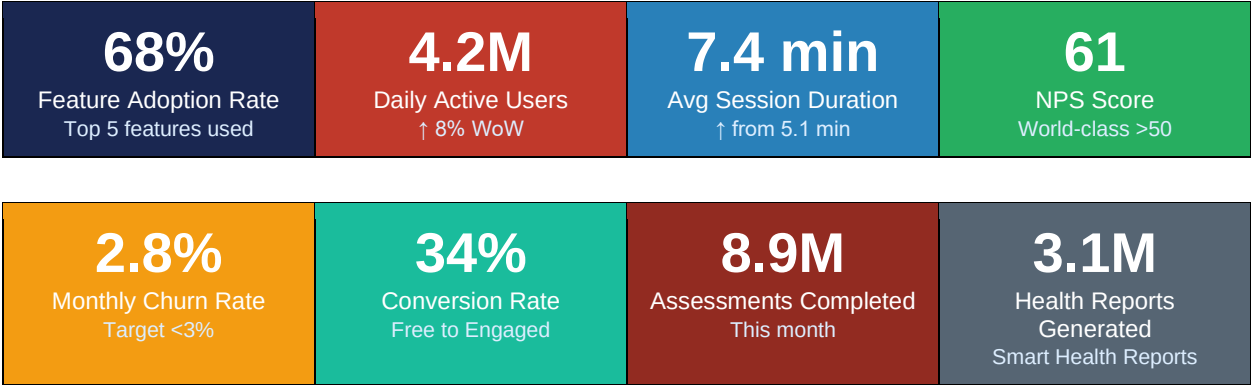

Suggested Visualizations

Visual	Type	X-Axis	Y-Axis / Metric	Business Question Answered
User Growth Trend	Line Chart	Month	Registered vs MAU	Are we acquiring AND retaining users?
Revenue by Segment	Stacked Bar	Quarter	₹ by segment (Insurance/Hospital/Pharma)	Which segment drives revenue?
Corporate Client Map	Geo Map	State/City	Client density	Where should sales focus?
Engagement Funnel	Funnel Chart	Stage	Users at each stage	Where do users drop off?
Claims Trend	Area Chart	Month	Claims filed vs. approved vs. denied	Is wellness reducing claims?
Retention Cohort	Heatmap	Month of acquisition	% active 3/6/12 months later	Which cohorts are most loyal?

KPI Formula Definitions

KPI	Formula	Target
MAU Rate	Monthly Active Users / Total Registered Users × 100	>60%
Customer Retention Rate	(Clients at End – New Clients) / Clients at Start × 100	>90%
Wellness Engagement Rate	Users with ≥1 activity in 30 days / Total Users × 100	>60%
Claim Ratio	Total Claims Paid / Total Premiums Received × 100	<40%
Policy Persistency	Policies renewed at year end / Policies issued × 100	>80%
Revenue per Active User (RPAU)	Total Revenue / MAU	↑ month-over-month

Dashboard 2: Product Performance Dashboard

Top Feature Adoption Table

Feature	Monthly Users	Adoption %	Avg Sessions/User	NPS Contribution
Face Vital Scan	12.4M	41%	3.2x	★★★★★
Health Risk Assessment	9.8M	33%	1.8x	★★★★★
Activity Tracking	8.1M	27%	8.4x (daily)	★★★★★
Smart Health Report	6.2M	21%	1.2x	★★★★★
Doctor Consultation	2.8M	9%	1.5x	★★★★★
Yoga & Meditation	2.1M	7%	4.1x	★★★★
Mental Wellness	1.9M	6%	3.8x	★★★★

Dashboard 3: Business Operations Dashboard

94.2% Requirement Accuracy BA to Dev handoff	89% Sprint Completion Rate Sprints on-time	96.8% SLA Compliance B2B client SLAs	18 hrs Ticket Resolution (Avg) Target <24 hrs
--	--	--	--

BA Process Health Metrics

Metric	Current	Target	Status	Action
Requirement Change Rate (post-sign-off)	12%	<8%	⚠ Needs Improvement	Improve stakeholder workshop quality
Defect Rate (BA-linked)	3.2%	<2%	⚠ Needs Improvement	Add BRD review checklist
User Story Completion per Sprint	88%	>90%	✅ On Track	Maintain velocity
Stakeholder Sign-off Time	4.2 days	<3 days	⚠ Needs Improvement	Digital sign-off via JIRA workflow
BRD Approval Cycle Time	6.8 days	<5 days	⚠ Needs Improvement	Parallel review process
UAT Pass Rate (First Pass)	91%	>92%	✅ On Track	Continue test case rigor

Dashboard 4: Healthcare Analytics Dashboard

58/100 Avg Health Risk Score Lower = healthier	71% Preventive Screening Rate Annual check-up availed	64% Wellness Participation Enrolled & active	28% Chronic Disease Detection Early-stage flags
---	--	---	--

Disease Risk Distribution (Corporate Clients)

Condition	% High Risk	% Moderate Risk	% Low Risk	WYH Intervention
Hypertension	38%	32%	30%	Cardiac Risk Assessment + BP Tracking
Pre-Diabetes	26%	41%	33%	Blood Sugar Tracking + Nutrition Program
Cardiovascular	32%	28%	40%	Face Vital Scan + Cardiac Assessment
Obesity / BMI	41%	29%	30%	AI BMI + Wellness Programs
Musculoskeletal	45%	33%	22%	Posture / Back / Neck Assessments
Mental Health	31%	38%	31%	Daily Emotion Tracking + Mental Wellness

PHASE 5 — SAMPLE BUSINESS ANALYST DOCUMENTS

5.1 Business Requirement Document (BRD) — Sample

Project

AI-Powered Predictive Claims Risk Alert System for Insurance Partners

BRD Section	Detail
Project Title	Predictive Claims Risk Alert System (PCRAS) v1.0
Prepared By	Business Analyst — Watch Your Health
Date	June 2026
Version	1.0 DRAFT
Business Sponsor	Chief Strategy Officer (CSO)
Stakeholders	Insurance Partners, Product Team, Data Science, Compliance, CIO
Business Objective	Build an AI-driven system that identifies insurance policyholders with high claims probability 6 months in advance, enabling targeted wellness intervention to reduce claim ratio by 15%.
In Scope	ML model for claims prediction; alert dashboard for insurance partners; automated nudge campaigns; reporting on intervention outcomes
Out of Scope	Actual claims processing; premium calculation; underwriting changes
Success Criteria	Claim ratio reduction $\geq 15\%$; Model accuracy $\geq 80\%$ (AUC); Intervention engagement rate $\geq 40\%$; Dashboard adoption by $\geq 80\%$ of insurance partners
Assumptions	Access to 24-month historical claims data from insurance partners; HIPAA-compliant data sharing agreement in place; users consent to health data usage
Constraints	CDSCO/IRDAI regulatory compliance required; 6-month implementation timeline; ₹1.5 Cr budget
Risk	Data quality from legacy insurance systems; Model bias risk; Regulatory approval timeline
Business Benefit	₹4-6 Cr annual claims savings across partners; Improved policy persistency; Stronger B2B contract renewal rates

5.2 User Stories — Sample (Agile Format)

User Story ID	As a...	I want to...	So that...	Acceptance Criteria
US-001	Insurance HR Manager	View real-time health risk scores for my employees	I can proactively intervene before claims spike	Dashboard loads in <3s; risk scores updated daily; filter by department, risk tier
US-002	Policyholder (end user)	See my Health Score improve as I complete assessments	I am motivated to maintain healthy habits	Score updates within 24h of assessment;

User Story ID	As a...	I want to...	So that...	Acceptance Criteria
				gamification badge shown; trend graph visible
US-003	WYH Data Analyst	Export cohort-level health trend data to Excel	I can prepare quarterly impact reports for clients	Export available as CSV/Excel; date range filter; minimum 12 columns of health metrics
US-004	Pharma Client Admin	Track patient adherence to treatment protocols weekly	I can measure program ROI and adjust interventions	Adherence % shown per patient cohort; automated alert if <50% adherence; HIPAA compliant
US-005	App User (Corporate)	Book an annual health check-up from within the app	I don't have to use a separate platform for lab booking	Booking confirms in <60 seconds; nearest lab shown; appointment reminder sent 24h before

5.3 AS-IS vs TO-BE Process — Insurance Wellness Engagement

AS-IS Process (Current State)

Step	Actor	Activity	Pain Point
1	Insurance Company	Policyholder buys policy — no further engagement	No wellness touchpoint established
2	Policyholder	Makes claim when sick — no prevention	Reactive healthcare model
3	Insurance Company	Processes claim — pays out	High claim ratio; no retention program
4	Insurance Company	Sends generic renewal reminder via SMS/email	Low renewal rate; no personalization
5	Policyholder	Lapses or renews based purely on price	No loyalty or health benefit perceived

TO-BE Process (WYH-Enabled Future State)

Step	Actor	Activity	WYH Feature Used
1	Insurance Company	Onboards WYH white-label app for policyholders	WYH Platform Integration API
2	Policyholder	Completes Health Risk Assessment on app	AI HRA + Face Vital Scan
3	WYH AI Engine	Generates personalized Health Score + risk flags	Smart Health Report + AI Engine
4	WYH Platform	Sends daily nudges, challenges, rewards based on health data	Gamification Engine + Personalized Nudges

Step	Actor	Activity	WYH Feature Used
5	Policyholder	Earns rewards for healthy activities; completes health check-up	Health Vault + Lab Booking + Habit Tracker
6	Insurance Company	Views real-time Corporate Dashboard with risk insights	Executive Dashboard + Claims Predictor
7	WYH AI Engine	Flags high-risk members; triggers wellness intervention	Predictive Claims Alert System
8	Policyholder	Renews policy — perceives high value from wellness benefits	High Persistency + Engagement

PHASE 6 — STRATEGIC RECOMMENDATIONS

6.1 Top 10 Product Improvements

#	Improvement	Business Impact	Priority	Est. Timeline
1	AI-guided 'Health Passport' onboarding flow	MAU +25%, Onboarding completion +40%	● Critical	Q3 2026
2	Unified Health Score across all assessments	Session depth +30%, Retention +15%	● Critical	Q3 2026
3	Predictive Claims Risk Dashboard for insurers	Claims ratio -15%, B2B renewal rate +20%	● Critical	Q4 2026
4	Self-serve B2B Client Portal (white-label reports)	Account expansion +30%, Support tickets -50%	● High	Q4 2026
5	Multilingual support (Hindi, Arabic, Malay)	GCC/SEA user acquisition +40%	● High	Q1 2027
6	Mental health module expansion (CBT exercises, therapist booking)	Engagement +25%, Premium ARPU +₹200/user	● High	Q1 2027
7	Wearable device integration (Apple Watch, Fitbit, Garmin)	Data richness +60%, Daily active usage spike	● Medium	Q2 2027
8	Family health plan feature (add spouse/children)	User network effect, B2C revenue stream	● Medium	Q2 2027
9	AI-powered meal scan & nutrition coaching	Nutrition tracking adoption 3x	● Medium	Q2 2027
10	Gamified corporate health challenges (team-based)	Corporate client engagement +45%, upsell	● Medium	Q3 2027

6.2 Top 10 AI Opportunities

#	AI Opportunity	Description	Expected ROI
1	Predictive Claims Model	ML model forecasting high-risk policyholders 6 months ahead	Claims cost -15%
2	Personalized Nudge Engine	LLM-powered messages tailored to each user's health data & behavior	Engagement +30%
3	AI Triage & Symptom Checker 2.0	NLP symptom checker connecting to doctor booking automatically	Consult conversion +40%
4	AI X-Ray Reading (expand)	Extend AI radiology to CT scans, MRIs for hospital partners	New revenue stream
5	Real-time Stress Detection	Using camera/microphone AI to detect stress during working hours	Corporate premium tier
6	Drug Adherence Prediction	ML model identifying patients likely to discontinue treatment	Pharma client ROI +25%
7	Automated Smart Health Report v2	Fully AI-generated narrative report with doctor-quality language	NPS +8 points

#	AI Opportunity	Description	Expected ROI
8	Insurance Fraud Detection	Anomaly detection on claims patterns for insurance partners	New revenue: anti-fraud SaaS
9	Genetic Risk Personalization	Use genetic data to hyper-personalize health recommendations	Premium tier pricing
10	Voice Health Coach (AI)	Voice-enabled daily health coaching in local languages	Accessibility + retention

6.3 Revenue Growth Strategies

#	Strategy	Revenue Impact	Timeline
1	Launch consumer B2C premium subscription (₹299/mo)	Massive new revenue stream from 30M user base	Q4 2026
2	Expand pharma patient support programs to 10 new companies	+₹5-8 Cr annually	Q3 2026
3	European market entry (via Paul Hennessy advisory)	New \$5M+ revenue potential	2027
4	Anti-fraud analytics SaaS for insurers	₹2-3 Cr new product revenue	Q1 2027
5	Corporate wellness HR analytics dashboard (premium tier)	+₹3 Cr from enterprise upgrades	Q4 2026
6	Health data licensing (anonymized, compliant) for pharma research	₹1-2 Cr recurring	2027
7	Lab partnership revenue share expansion (3,300 → 10,000 labs)	+₹2 Cr from referral fees	2027
8	OPD tie-up monetization (specialist referrals)	Revenue share per appointment	Q3 2026
9	Regional insurer partnerships in tier-2/3 cities	+₹4-6 Cr from underserved markets	Q1 2027
10	API marketplace (sell health assessment APIs to third parties)	Platform revenue model unlock	2027
